

## THE ITALIAN INDUSTRY OF WOODWORKING TECHNOLOGY

Woodworking technology production, the “flower in the buttonhole” of Italian industry, boasts a wide and diversified portfolio, from primary operation equipment for raw materials to surface finishing systems, up to the secondary processing of solid wood and wood-based panels.

Italy exports all over the world and its strong propensity to globalization has been one of the keys to overcome the crisis. Made-in-Acimall, a synonym for quality, flexibility and innovation, is known and appreciated in each market, as witnessed by the growth of the industry in recent years.

In 2018, the Italian production of woodworking machine tools amounted to 2,514 million euro, with an increase by more than 10 percent compared to the previous year. This is a niche sector with two unique elements and very high added value.

The first distinctive element is that the trade balance was positive by 1,721 million euro in 2018, a significant contributor to Italian economy, consolidating and growing over the years. The second element is the share on apparent consumption, equal to 77 percent, which is really high: this means that the Italian woodworking industry, world leader for design and quality, prefers to purchase made-in-Acimall technology. This is further evidence that Italian machinery manufacturers can respond effectively to all customers, wherever they are.

In the year 2018, both the export and the domestic market achieved the best results in the past ten years, climbing back to pre-crisis level, though not considering inflation effects. The continuation of Industry 4.0 incentives ensured the stability of the domestic market in the medium term.

ITALIAN TRADE AGENCY

### ITALIAN TRADE AGENCY

1300 Post Oak Blvd.  
Suite 775 Houston, TX 77056  
T: +1 (281) 888 4288 / F: +1 (281) 974 3100  
Email: houston@ice.it / Web: www.ice.it  
Contact: Antonietta Baccanari

The Italian Trade Agency is the government organisation which promotes the internationalization of the Italian companies, in line with the strategies of the Ministry for Economic Development. ITA provides information, support and advice to Italian and foreign companies. In addition to its Rome headquarters, ITA operates worldwide from a large network of Trade Promotion Offices linked to Italian embassies and consulates and working closely with local authorities and businesses.

### ACIMALL - ITALIAN WOODWORKING TECHNOLOGY ASSOCIATION
